

Cold Processed Soap with Rapeseed Oil

Carefully put together by our General Manager, using Rapeseed Oil as a substitute for Palm Oil and using the cold processed soap technique. When making this soap, trace was reached very quickly. It produced a lovely soap, which was hard and performed as expected. The lather was good with big bubbles the skin was left soft and moisturized.

For those who do not like to use Palm Oil, this is an effective substitute!

This recipe can be used as a guideline for beginners in the cold processed soap technique

Follow the same cold process method you would usually use with the following ingredients:

* Stocked at hfostersoaponline.co.uk
